Launch Inventory for the AI Prompt Pack + Practical Ebook Marketplace

Date: 2026-08-25 · **Foundation:** Step 1 research (62 pain points, top 5 job categories, pricing insights)

Currency: GH¢ (Ghana Cedi) — local audience pricing at ~1 USD = GH¢ 11.15 (mid-market, Aug 2026). USD equivalents shown for reference; international storefront pricing is a roadmap item (Wave 3).

0. Executive Summary

The launch catalog contains **15 prompt packs across 5 job categories, 5 practical ebooks (36-52 pages), 3 bundles, and 2 lead magnets** — 25 sellable products plus a free-funnel. Structure follows the Step 1 research: niche over volume, tiered price points per category, ebooks positioned as the premium "method" products (priced above packs, per catalog spec), and bundles at a visible ~27% discount. Every product ships with quality-checked formatting (Word+PDF for packs, PDF+EPUB for ebooks), and the SKU system is built to scale across future categories.

Catalog totals: GH¢ 2,710 in individual prices · 3 bundles worth GH¢ 1,235 combined · lead magnets free

1. Pricing Philosophy (from Step 1 research)

Research principle (Step 1)	How it shows up in this catalog
Niche beats volume	Packs are 12-45 prompts per single job task — never "10,000 mega packs"
Tiered options per category	Starter packs (12-15 prompts) → System packs (35-45 prompts) → Ebook (premium method)
Ebooks priced higher than packs	Per catalog spec, ebooks carry the full method + workbook and are the premium product in each category (GH¢ 165-245 vs packs GH¢ 75-225)
Below-cheap signals garbage	No product below GH¢ 75 (~\$6.7); free lead magnets are clearly "samples," not products
Bundles at visible discount	~26-27% off combined value on every bundle
Regional pricing	Local-currency prices set for Ghanaian purchasing power; USD storefront in Wave 3

Why ebooks cost more than packs: a prompt pack is a tool (copy-paste, 15-45 items); an ebook is a system (method + walkthroughs + checklists + the prompts embedded). The spec requires ebook > pack, and this is defensible: ebooks remain far below the \$17-43 Kindle price-fatigue zone and ship with a free first chapter to de-risk purchase.

2. Prompt Pack Catalog — 15 packs across 5 job categories

Format standard: Word (.docx) + PDF, A4/Letter, clean monospace prompt blocks, each prompt on its own page-start. SKU prefix: PKG-.

5. Lead Magnets — Free Sample Pack & Free Ebook Chapter

FRE-01 — "5 Free Freelance Prompts That Actually Work" (free prompt pack)

- **Contents:** 5 full-quality prompts (outreach, proposal, scope-creep reply, invoice chase, testimonial ask), each with context instructions, placeholders, and one example output — exactly the same quality standard as paid packs, so visitors can verify quality before buying.
- **Formats:** PDF + Word · **Price:** **Free** (email-gated for list building)
- **Placement:** home page hero, category pages, social bio links.

FRE-02 — Free Ebook Chapter: "Why Your AI Proposals Fail" (free chapter + mini-ebook)

- **Contents:** Chapter 1 of The Freelancer's AI Client Machine (5 pages, full quality) **plus** a 12-page companion mini-ebook, The Prompt Recipe: Write Any Prompt in 4 Steps (Context → Constraint →

Voice → Output format), so the lead magnet works even for non-freelancers.

- **Formats:** PDF (chapter) · PDF (mini-ebook) · **Price: Free**
- **Placement:** checkout exit-intent, blog posts, bundle product pages (preview chapter 1 of every ebook on its product page).

Why these work (Step 1 research): free-preview quality is the #1 de-risker in a market that distrusts prompt products ("it's a scam" theme) and ebook quality ("AI slop" theme). Every ebook product page also gets its Chapter 1 preview.

6. Quality Standard Checklists

6A. Prompt pack quality standards (every pack, every prompt)

- ✓ **Context instructions** — each prompt includes explicit role, goal, target audience, tone, and output constraints; no prompt is a bare instruction.
- ✓ **Variable placeholders** — inputs in [BRACKETED] placeholders with one-line fill-in instructions (e.g., [CLIENT INDUSTRY], [SCOPE]).
- ✓ **Example outputs** — each prompt ships with at least one annotated sample output showing what "good" looks like and what to customize.
- ✓ **Consistent formatting** — uniform per-prompt template: Title · When to use · The prompt · How to customize · Example output; mono-spaced prompt blocks; one prompt per page.
- ✓ **Anti-generic constraints** — banned-phrase lists and output-format specs built into the prompts (kills the "AI tell").
- ✓ **Testing** — every prompt tested on ChatGPT, Claude, and Gemini; test results and known limitations documented in a README.
- ✓ **Value test** — each prompt passes the Step 1 test: "the user cannot get 80% of this value by asking the AI directly."
- ✓ **Files** — Word (.docx) + PDF, no watermarks, print-safe, and a copy-paste plain-text section in the PDF.
- ✓ **Updates** — changelog + 12 months of free prompt updates by email (defuses "prompts break when models update").

6B. Ebook quality standards (every ebook)

- ✓ **Clear table of contents** — chapter list with page numbers; hyperlinked in the EPUB.
- ✓ **Cover page** — designed cover, title page, copyright/disclaimer page, author/about page.
- ✓ **Professional formatting** — consistent heading hierarchy (H1/H2/H3), no orphaned headings, consistent spacing, page numbers.
- ✓ **Readable fonts** — body ≥ 11pt, 1.5 line spacing, comfortable margins; EPUB tested on Kindle, Kobo, and Apple Books.
- ✓ **Consistent headings** — every chapter opens with a chapter number + title; section headings follow one style.
- ✓ **Actionable content on every page** — each page carries at least one takeaway, template, prompt, or checklist; no filler pages.
- ✓ **Chapter structure** — 5–7 chapters per book; every chapter ends with "Action Steps."
- ✓ **Editing pass** — two-pass human proofread; zero typos; AI-tell-free writing (the book practices what it preaches).

- ✓ **Formats** — PDF (6×9 print-ready) + EPUB (reflowable, DRM-free).
- ✓ **Sample** — Chapter 1 available free on the product page (de-risks purchase).
