1 Buyer Journey Maps

Four numbered journeys covering prompt purchase, ebook purchase with format selection, bundle purchase, and re-download.

Journey 1 · First-time buyer purchases a prompt pack

#	Buyer action	System response	Page / route
1	Lands on the site from an ad / WhatsApp link, sees the hero offer.	Hero renders; lead-magnet capture visible.	/
2	Taps “Shop prompts”.	Shop loads with type tabs and category filter.	/shop?type=prompts
3	Taps the “Prompts” tab, filters “Freelancers”, opens “Outreach & Proposals”.	Product page shows count, formats (Word+PDF), GH¢ 75, and a 3-prompt sample preview.	/products/prompt-pack/pkg-fre-01
4	Reads “What’s inside”, previews sample prompts, taps “Add to cart”.	Cart badge updates; item stored with type + format.	/cart
5	Taps “Checkout”, enters email + phone, confirms Word+PDF, selects MTN MoMo.	Order created (pending); step 2 shows amount and payment prompt status.	/checkout (step 1)
6	Approves the MoMo prompt on their phone with PIN.	Webhook received → signature verified → order marked paid → files fulfilled.	/checkout (step 2)
7	Sees the confirmation screen with download buttons; also gets SMS + email.	Signed links (30-min TTL) generated; email + SMS sent.	/checkout/confirmation/1024
8	Taps “↓ Download Word+PDF”, file saves on the phone.	Signed URL streamed; range-request supported.	/downloads/{token}
9	Optional: creates an account to keep re-download access.	Purchase linked to the account; appears in dashboard.	/auth/signup

Journey 2 · First-time buyer purchases an ebook with format selection

#	Buyer action	System response	Page / route
1	Opens Shop, taps the “Ebooks” tab, sees “Human-Sounding AI Copy”.	Ebook card shows cover, page count, PDF/EPUB chips, GH¢ 185.	/shop?type=ebooks
2	Opens the ebook product page.	Layout: cover, synopsis, TOC preview accordion, author section, page count, format toggle.	/products/ebook/ebk-mkt-01
3	Reads Chapter 1 (free preview), flips the format toggle to EPUB (reads on phone).	Selection stored on the cart item.	—
4	Adds to cart; cart line shows “EPUB” with a change link.	Format locked at checkout step 1 for confirmation.	/cart
5	Checkout: email + phone, confirms EPUB, picks Telecel Cash.	Order pending; Telecel USSD prompt initiated.	/checkout (step 1)

#	Buyer action	System response	Page / route
6	Approves payment on the phone.	Webhook verified → paid → EPUB link generated (other formats stay available in dashboard).	/checkout (step 2)
7	Downloads EPUB from confirmation page.	Signed link delivered; also via SMS + email.	/checkout/confirmation/1025
8	Later opens the ebook and it renders in the reader app.	EPUB is reflowable; dashboard notes “PDF also available”.	/account/downloads

Journey 3 · Buyer purchases a bundle and receives multiple files

#	Buyer action	System response	Page / route
1	Sees “Complete Marketing AI Toolkit — save 27%” on the home page.	Featured bundle renders with savings badge.	/
2	Opens the bundle product page.	Itemized list with thumbnails + descriptions; combined GH¢ 435 struck through, GH¢ 319 highlighted.	/products/bundle/bnd-mkt-01
3	Reads included items, taps “Add to cart”.	Cart shows bundle as one line with savings summary.	/cart
4	Checks out via MTN MoMo (single payment of GH¢ 319).	One order, one payment, one fulfillment job.	/checkout
5	Approves payment; confirmation page appears.	Pre-built ZIP (~40 MB) link unlocked; SMS + email sent.	/checkout/confirmation/1026
6	Downloads the ZIP; extracts on device.	Contents: 2 packs (Word+PDF) + 1 ebook (PDF+EPUB) + README + license.	/downloads/{token}
7	Finds the ZIP is also in the dashboard for later.	Re-download available anytime with fresh links.	/account/downloads

Journey 4 · Returning buyer logs in and re-downloads in a different format

#	Buyer action	System response	Page / route
1	Returns to the site two weeks later; taps “Log in”.	Login page with email/password or OTP.	/auth/login
2	Verifies identity (password or SMS OTP).	Session created; redirected to dashboard.	/account
3	Opens “My downloads”.	Lists all purchases with format options.	/account/downloads
4	Finds “Human-Sounding AI Copy” (bought as PDF), taps “EPUB ↓”.	New signed link generated (30-min TTL); download starts.	/account/downloads
5	Also refreshes the expired bundle ZIP link.	Fresh URL issued; old token revoked.	/account/downloads

#	Buyer action	System response	Page / route
6	Downloads both files to a new device.	No re-purchase needed — files tied to the account.	/account/downloads

2 Admin Journey Map

Uploading a prompt pack, uploading an ebook with cover image and table of contents, and creating a bundle from existing products.

#	Admin action	System response	Screen
1	Admin → Products → “New prompt pack”.	Empty form loads with all pack fields.	/admin/products/prompts/new
2	Fills title, description, count, category, GH¢ price; uploads Word + PDF; adds 3 preview prompts; ticks the “tested on 3 models” checklist.	Files validated (format, size, virus scan); previews rendered.	form
3	Saves → pack live in the shop.	SKU PKG-... assigned; card appears under Prompts tab.	/shop?type=prompts
4	Admin → Products → “New ebook”.	Ebook form: cover dropzone, title, synopsis, TOC, author, page count, price, PDF+EPUB upload.	/admin/products/ebooks/new
5	Uploads cover (600×900), pastes TOC, uploads PDF + EPUB, sets sample chapter.	Cover processed; TOC hyperlinked in EPUB; sample chapter served on product page.	form
6	Saves → ebook live.	SKU EBK-... assigned; format toggle functional.	/shop?type=ebooks
7	Admin → Bundles → “Build bundle”.	Product picker loads all packs + ebooks with prices.	/admin/bundles/new
8	Selects 3 products → combined value auto-computed (GH¢ 435) → enters GH¢ 319 → ZIP auto-assembled → publishes.	Savings badge (27%) computed; ZIP built once and stored; bundle live.	/admin/bundles

3 Mobile Money & Telecel Cash Checkout Flow

The exact sequence from product page to instant download, including the on-phone approval and webhook verification.

Format selection happens in Cart (per item) and is confirmed in Step 1 — ebooks: PDF or EPUB · bundles: single ZIP · prompts: Word+PDF

The same diagram applies to Telecel Cash — only the gateway endpoint and phone-number prefixes change (MTN: 024/054/055/059 · Telecel: 020/026/027/050). Format selection happens in the cart (per item) and is confirmed in checkout step 1 before payment is initiated. Download links are HMAC-signed with a 30-minute TTL and unlock only after the webhook marks the order paid.

4 Error State Inventory

Payment failures, delivery issues, format compatibility and access problems — what the buyer sees and how the system recovers.

Error	When it happens	What the buyer sees	System behavior	Recovery
Payment failed / declined	Gateway rejects the charge request.	"Payment failed. Please try again or choose another method." with retry + method switch.	Order stays "pending"; no files sent.	Retry button; switch MoMo ↔ Telecel; support contact.
Insufficient balance	MoMo/Telecel balance below the amount.	"Insufficient balance on your line. Top up and try again."	Gateway returns insufficient-funds code; order untouched.	Auto-refresh after top-up; cancel order option.
Network timeout	Buyer approves, but the confirmation webhook never arrives (drop-off).	"We're still checking your payment..." with a check-status button.	Status polling + reconciliation job; if paid, order auto-fulfills on webhook.	Buyer taps "I've approved" → status refresh; downloads unlock automatically.
Invalid phone number	Wrong prefix or malformed number at step 1.	Inline error: "Enter a valid MTN (024/054/055/059) or Telecel (020/027/050) number."	Client + server validation before initiating payment.	Correct number; prefix guidance shown.
Expired download link	Link older than the 30-minute TTL.	"This download link has expired. Get a fresh one from your dashboard."	Token rejected by signature/TTL check.	Dashboard generates new links anytime; login prompt for guests.
Download interrupted	Mobile data drops mid-download (large ZIP).	"Download paused" with resume button.	Range requests supported; partial file retained.	"Resume" continues from byte offset; retry generates new token.
Unsupported format	Buyer tries to open EPUB on a device without a reader.	"This format isn't supported here. Use the Kindle/Books app, or download the PDF instead."	Format matrix shown on product page and dashboard.	Format switch in dashboard; PDF fallback always available.
Webhook timeout / paid but unfulfilled	Gateway confirms but fulfillment job stalls.	"We're preparing your files..." (auto-refresh).	Reconciliation job marks order paid and retries fulfillment.	Files appear automatically; support can resend links.
Duplicate payment	Buyer pays twice (double prompt).	Confirmation shows one order; second charge flagged.	Idempotency keys dedupe orders; duplicate auto-refunded.	Refund receipt emailed; support ticket if >48 h.
SMS / email not received	Delivery notification lost in spam or wrong number.	Confirmation page still shows downloads; "Resend links" available.	Logs delivery attempt; resend endpoint.	Resend from confirmation page or dashboard.

5 Low-Fidelity Wireframes — Mobile First

Every MVP page at 360–430 px width. Blocks show section order and component structure; text labels show real store copy. Product-type layouts are distinct: prompt packs (count + sample), ebooks (cover · synopsis · TOC · author · format toggle), bundles (itemized list + strikethrough savings).

6 Desktop Wireframes (Secondary)

The same pages scale to desktop: wider grids, top navigation, sidebar filters. Admin is desktop-first.

7 Reusable Component Inventory

The building blocks used across all pages, with variants and states.

Component	Variants / states	Notes
Navbar	Top bar (logo, menu, search) · bottom nav (Home, Shop, Cart, Account)	Sticky bottom nav on mobile; desktop switches to top nav only.
Product card — prompt	Default · sale · out-of-stock (n/a at launch)	Badge “PROMPT PACK · N prompts”, price, Word+PDF chips.
Product card — ebook	Default · featured	Cover thumb, page count, PDF/EPUB chips, “Free chapter” tag.
Product card — bundle	Default · featured	“BUNDLE · 3 items · save 27%”, strikethrough value + bundle price.
Type tabs	All / Prompts / Ebooks / Bundles (active state)	Query param ?type=; category filter combines with tabs.
Format selector	PDF / EPUB segmented control (ebook) · Word+PDF fixed (prompt) · ZIP fixed (bundle)	Selection set in cart, confirmed in checkout step 1, changeable in dashboard.
Download button	Ready (↓, 30-min TTL) · expired (get new link) · resume (🔄 partial)	Signed URLs; big tap target; progress shown for large files.
Checkout form	Step 1: contact + format confirm + payment method; Step 2: pay + poll	2 steps max; validation inline; back button preserves state.
Payment method cards	MTN MoMo · Telecel Cash (radio) · Cards “coming soon” (disabled)	Shows network logos and “you’ll approve on your phone” note.

Component	Variants / states	Notes
Order/status chip	pending · paid · fulfilled · failed · refunded	Colour-coded; shown in admin, confirmation, dashboard.
Admin panel	Sidebar + KPI cards + tables (products, bundles, orders)	Desktop-first admin; mobile falls back to stacked cards.
Empty/error states	Empty cart · empty downloads · failed payment · expired link	Every state has a CTA (browse shop, retry, get new link).
