

Complete Copy & Content System

Tested AI prompt pack — Word + PDF

Complete Copy & Content System

The whole marketing engine in one pack. Run these prompts in order when building a campaign, then weekly to keep it running.

Prompt count: 12 · Category: marketing · Price: GH¢ 165

Positioning statement

WHEN TO USE

Before any campaign.

THE PROMPT

Build a positioning statement for [PRODUCT/SERVICE]. Audience: [AUDIENCE]. Category: [CATEGORY]. Key benefit: [BENEFIT]. Key difference vs [COMPETITORS]: [DIFFERENCE]. Output: one sentence following 'For [AUDIENCE] who [PAIN], [PRODUCT] is the [CATEGORY] that [BENEFIT], unlike [ALTERNATIVE] because [DIFFERENCE]'.

CUSTOMIZE

Test it on a customer — if they nod, it's right.

WHAT GOOD LOOKS LIKE

The one sentence every ad should be able to trace back to.

Campaign brief

WHEN TO USE

Kicking off a campaign.

THE PROMPT

Write a one-page campaign brief for [OFFER]: objective (awareness/traffic/sales), audience with 3 pains, core message, proof points, channels [LIST], budget GH¢ [AMOUNT], timeline [WEEKS], success metric, and 3 creative angles. Keep it skimmable - an agency could execute it without asking questions.

CUSTOMIZE

Pick ONE primary metric - a brief with 3 goals has none.

WHAT GOOD LOOKS LIKE

A brief that keeps every channel marching in the same direction.

Channel-by-channel message map

WHEN TO USE

Same campaign, many channels.

THE PROMPT

For the campaign [BRIEF SUMMARY], write the adapted message for: email (150 words), Instagram/Facebook post (70 words), LinkedIn post (200 words), landing page hero (30 words), WhatsApp broadcast (50 words). Same core promise, different containers. Note the channel-specific tweak for each.

CUSTOMIZE

Match the platform's natural voice - LinkedIn is formal, WhatsApp is chatty.

WHAT GOOD LOOKS LIKE

A message map that keeps one campaign consistent everywhere.

Repurposing engine

WHEN TO USE

One asset, zero time.

THE PROMPT

Take this content: [PASTE]. Repurpose into: 5 social posts, 3 email sections, 1 short video script (30s), 1 long-form blog outline, 3 quote cards, and 1 infographic outline. Keep the core message identical. Rank the repurposed pieces by expected reach.

CUSTOMIZE

Start with your best-performing asset, not your newest.

WHAT GOOD LOOKS LIKE

Six weeks of content from one piece of work.

Content pillar map

WHEN TO USE

Planning a quarter.

THE PROMPT

Design 4 content pillars for [BRAND] in [NICHE]: pillar name, audience question it answers, 3 formats that fit it, and 2 examples of existing content that worked. Then generate 12 content ideas (3 per pillar) with working titles.

CUSTOMIZE

Pillars should overlap with what you can prove you know.

WHAT GOOD LOOKS LIKE

A quarter of content with a reason behind every piece.

Competitor gap analysis

WHEN TO USE

Feeling outmatched.

THE PROMPT

Here are 3 competitors and their content: [PASTE LINKS/NOTES]. Compare: what they cover, their tone, their offers, what they NEVER talk about. Identify: (1) the topic gap we can own, (2) the tone gap (e.g. they're corporate, we can be plain), (3) the offer gap, (4) 5 content ideas exploiting the gaps.

CUSTOMIZE

Gaps you can exploit are more valuable than strengths you can copy.

WHAT GOOD LOOKS LIKE

A map of the territory they've left open for you.

Sales page structure

WHEN TO USE

Building a high-converting page.

THE PROMPT

Outline a sales page for [OFFER] at GH¢ [PRICE] using this structure: (1) hero - outcome + proof, (2) problem agitation, (3) solution + how it works, (4) features as benefits, (5)

social proof, (6) objection handling, (7) offer stack + guarantee, (8) scarcity/deadline, (9) FAQ, (10) final CTA. Write the headline + first paragraph for each section.

CUSTOMIZE

Move objection handling before pricing if your audience is skeptical.

WHAT GOOD LOOKS LIKE

A page skeleton that follows proven conversion anatomy.

Performance review of a campaign

WHEN TO USE

Campaign ended.

THE PROMPT

Here are my campaign results: [PASTE METRICS - impressions, clicks, conversions, cost, revenue per channel]. Analyze: (1) what actually drove results vs noise, (2) which channel/angle to double down on, (3) what to kill, (4) 3 hypotheses to test next time, (5) a one-paragraph summary for my boss/client.

CUSTOMIZE

Include the creative variants so the 'why' is visible.

WHAT GOOD LOOKS LIKE

A review that turns spend into learning.

Newsletter welcome sequence

WHEN TO USE

New subscribers.

THE PROMPT

Write a 4-email welcome sequence for new subscribers to [BRAND]: email 1 - the welcome + what to expect + best resource, email 2 - the story (why we exist), email 3 - the proof (best results), email 4 - the first offer (soft). Each 100-150 words, ending with one action. No 'I'm thrilled to have you' cliches.

CUSTOMIZE

Email 2's story should be true and specific.

WHAT GOOD LOOKS LIKE

A welcome path that turns subscribers into buyers.

Launch day plan

WHEN TO USE

Launch week.

THE PROMPT

Build a 7-day launch plan for [OFFER]: day-by-day activities across email/social/WhatsApp/partners, each with the asset needed and the expected action. Include: pre-launch tease (day -3 to -1), launch day burst, mid-launch proof drop, final-day urgency. Mark the 3 highest-impact actions.

CUSTOMIZE

Fewer channels done daily beats many channels done once.

WHAT GOOD LOOKS LIKE

A launch calendar with no dead days.

UGC/testimonial mining

WHEN TO USE

No proof to show.

THE PROMPT

Here are customer messages/reviews: [PASTE]. Extract: (1) the 5 strongest quotes verbatim, (2) for each, the result mentioned and the emotion, (3) which quote fits which use case (ads, landing page, email), (4) a request template to ask for permission to use each.

CUSTOMIZE

Get written permission - screenshots without it are risky.

WHAT GOOD LOOKS LIKE

A proof library from customers who already did the selling.

Monthly marketing report

WHEN TO USE

Reporting time.

THE PROMPT

Turn these numbers into a monthly report: [PASTE METRICS]. Structure: (1) headline - the one number that matters, (2) what worked with evidence, (3) what didn't with reasons, (4) spend vs return, (5) next month's plan with 3 priorities. Under 300 words, plain language, a non-marketer could understand it.

CUSTOMIZE

Lead with the number your boss cares about, not the one you like.

WHAT GOOD LOOKS LIKE

A report that makes your work legible to anyone.
